PRODUCT: KoolCote ACRYLIC CONCRETE CLEAR SEAL AND FINISH

TYPE: ACRYLIC COPOLYMER EMULSION

PRODUCT DESCRIPTION: KoolCote Acrylic Concrete Clear Seal and Finish is a low sheen acrylic product designed for use over new and old, properly prepared concrete surfaces.

USES: May be used on concrete decks, floors and walls. May also be used for sealing heavy pores in concrete blocks. KoolCote Acrylic Concrete Clear Seal and Finish is more commonly used as a top coat for KoolCote All-Purpose Acrylic Concrete Finishes to give gloss and to improve water resistance.

APPLICATION AND CLEAN UP: Apply with paint roller, nylon brush or airless spray equipment. All surfaces to be coated must be cleaned and free of dirt, oil, wax or loose concrete. Old concrete surfaces must be water-blasted and cleaned with a good mildewicide (TSP) before application. If more sheen is desired, apply a thin top coat until desirable results are achieved. New concrete should be cured (28 days) and etched before application. Clean tools with soapy water immediately after use. Rinse well with clean water.
